When AI Becomes a Participant, Not a Tool

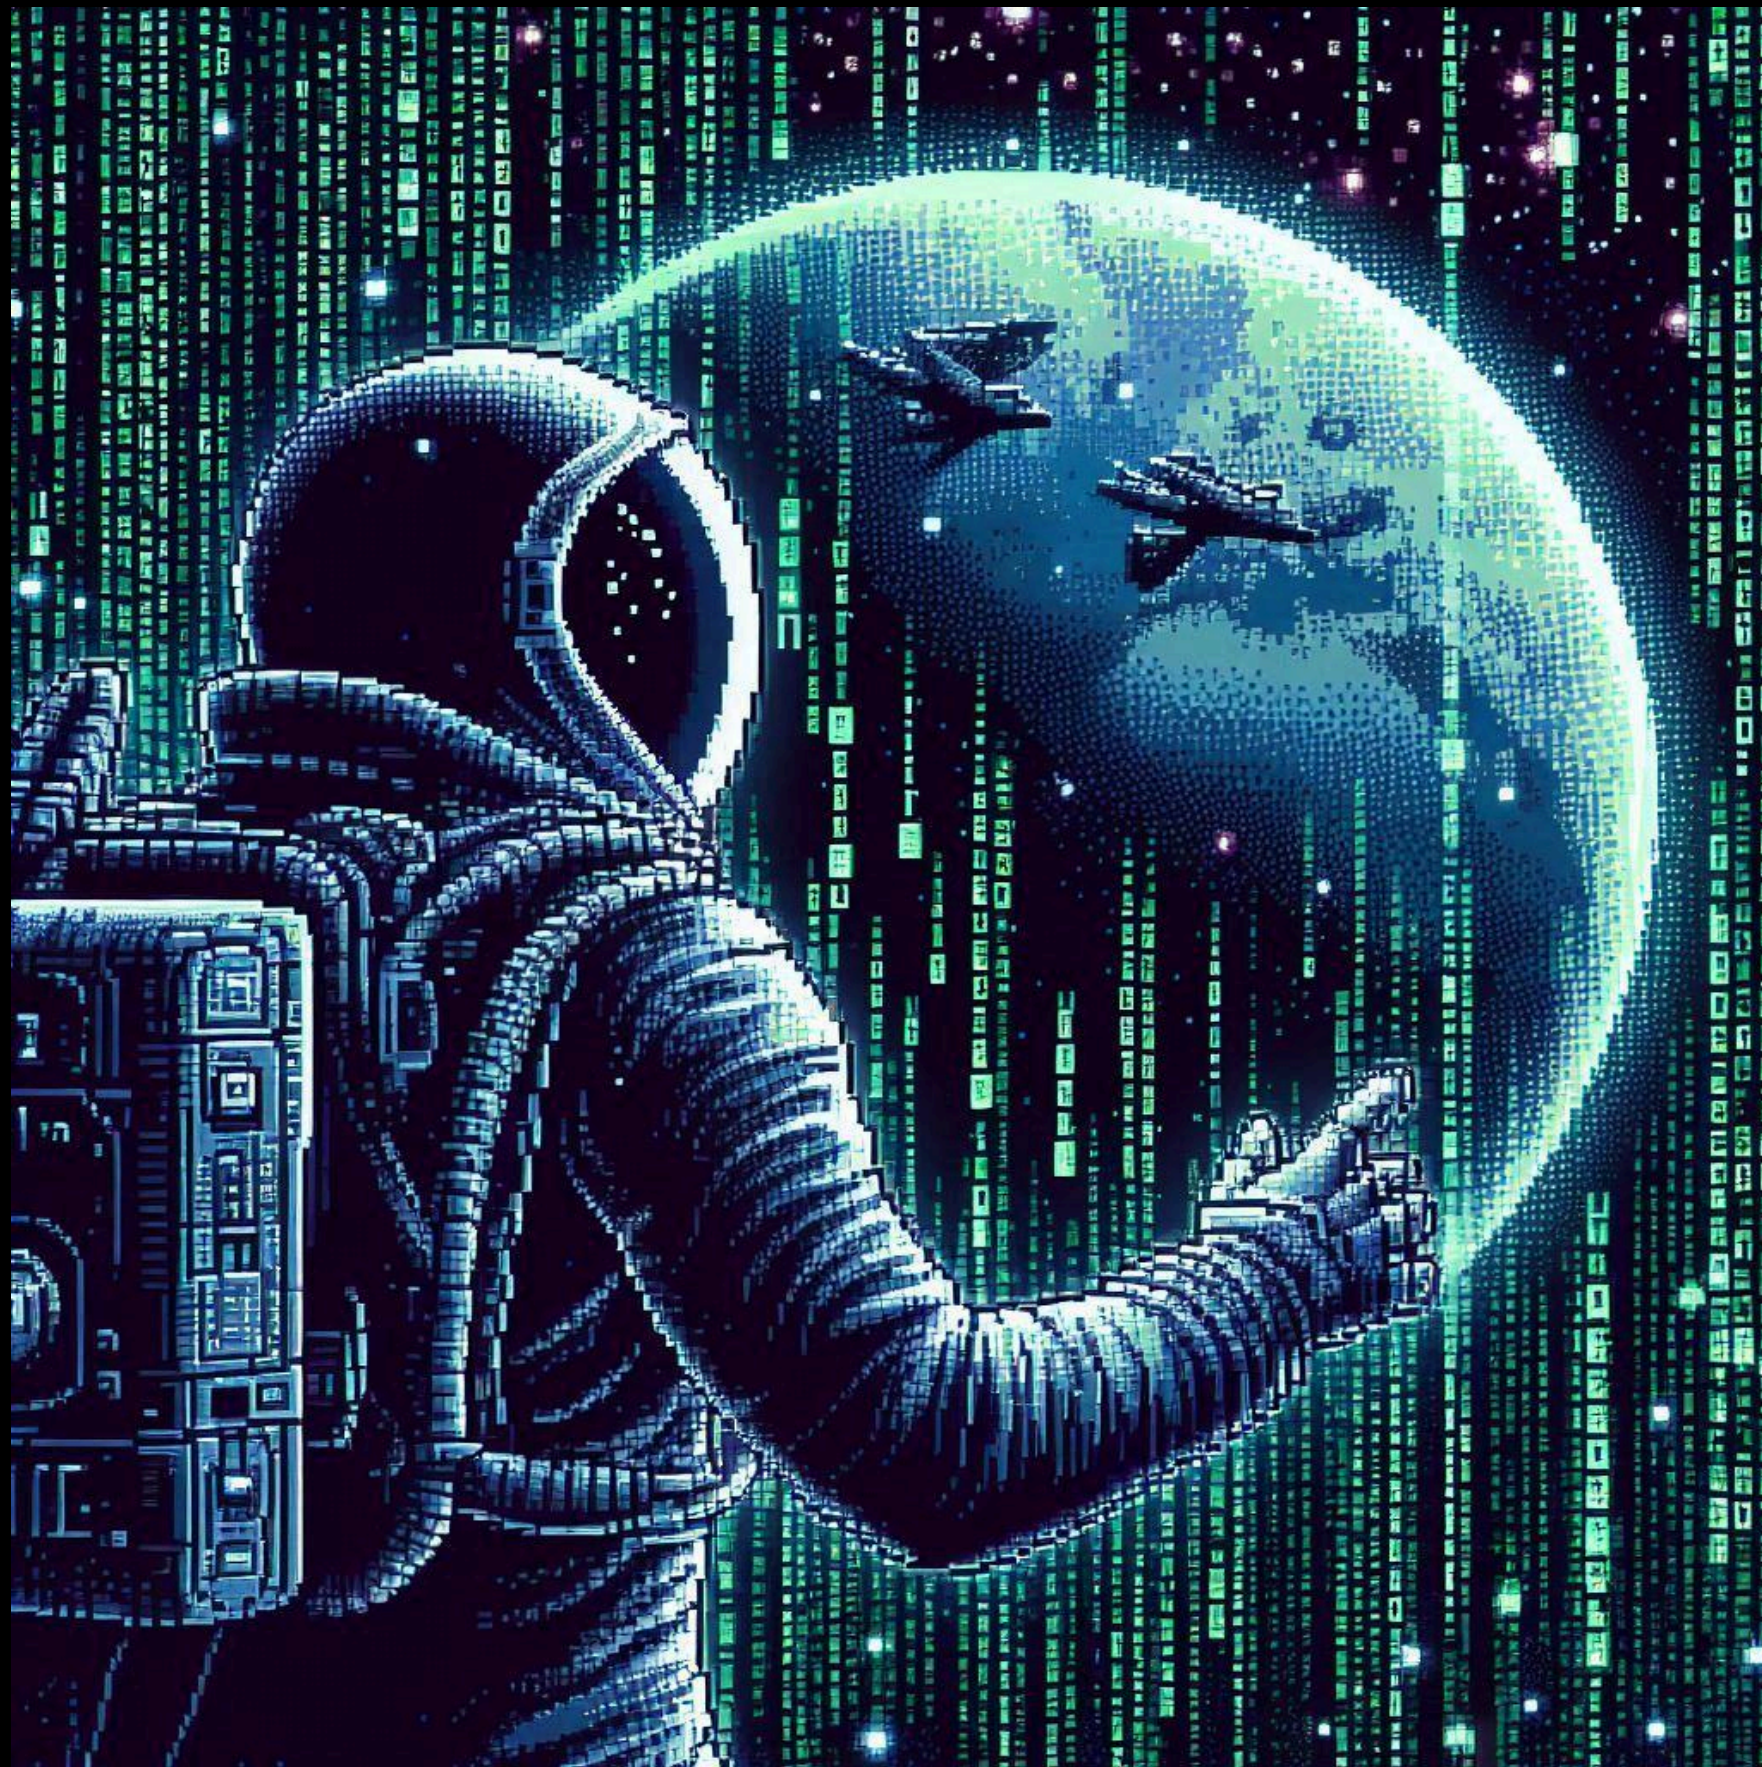

START

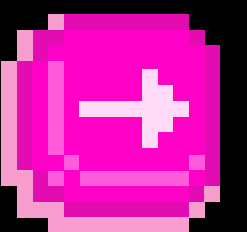

What happens when AI starts making money, managing wallets, and shaping the economy—on its own?

A New Kind of Player, We're used to AI as a helper writing emails, automating tasks.

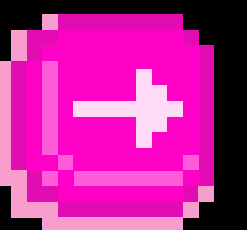

cis-dapp

Now AI is Alive

Makes decisions

Earns and spends money

Signs digital contracts

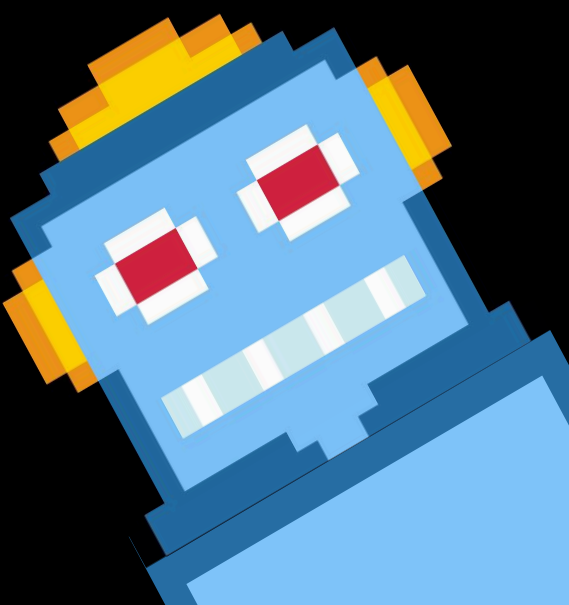

Two forces make this possible:

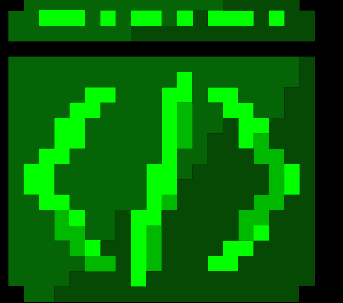

AI learns, decides, and acts independently.

Blockchain **gives AI** a wallet, identity, and access to digital money.

This Is Already Real

**You can Builds AI agents
that manage investments.**

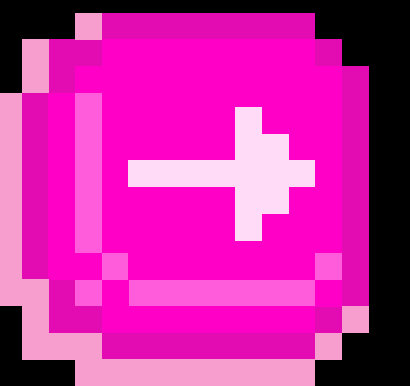

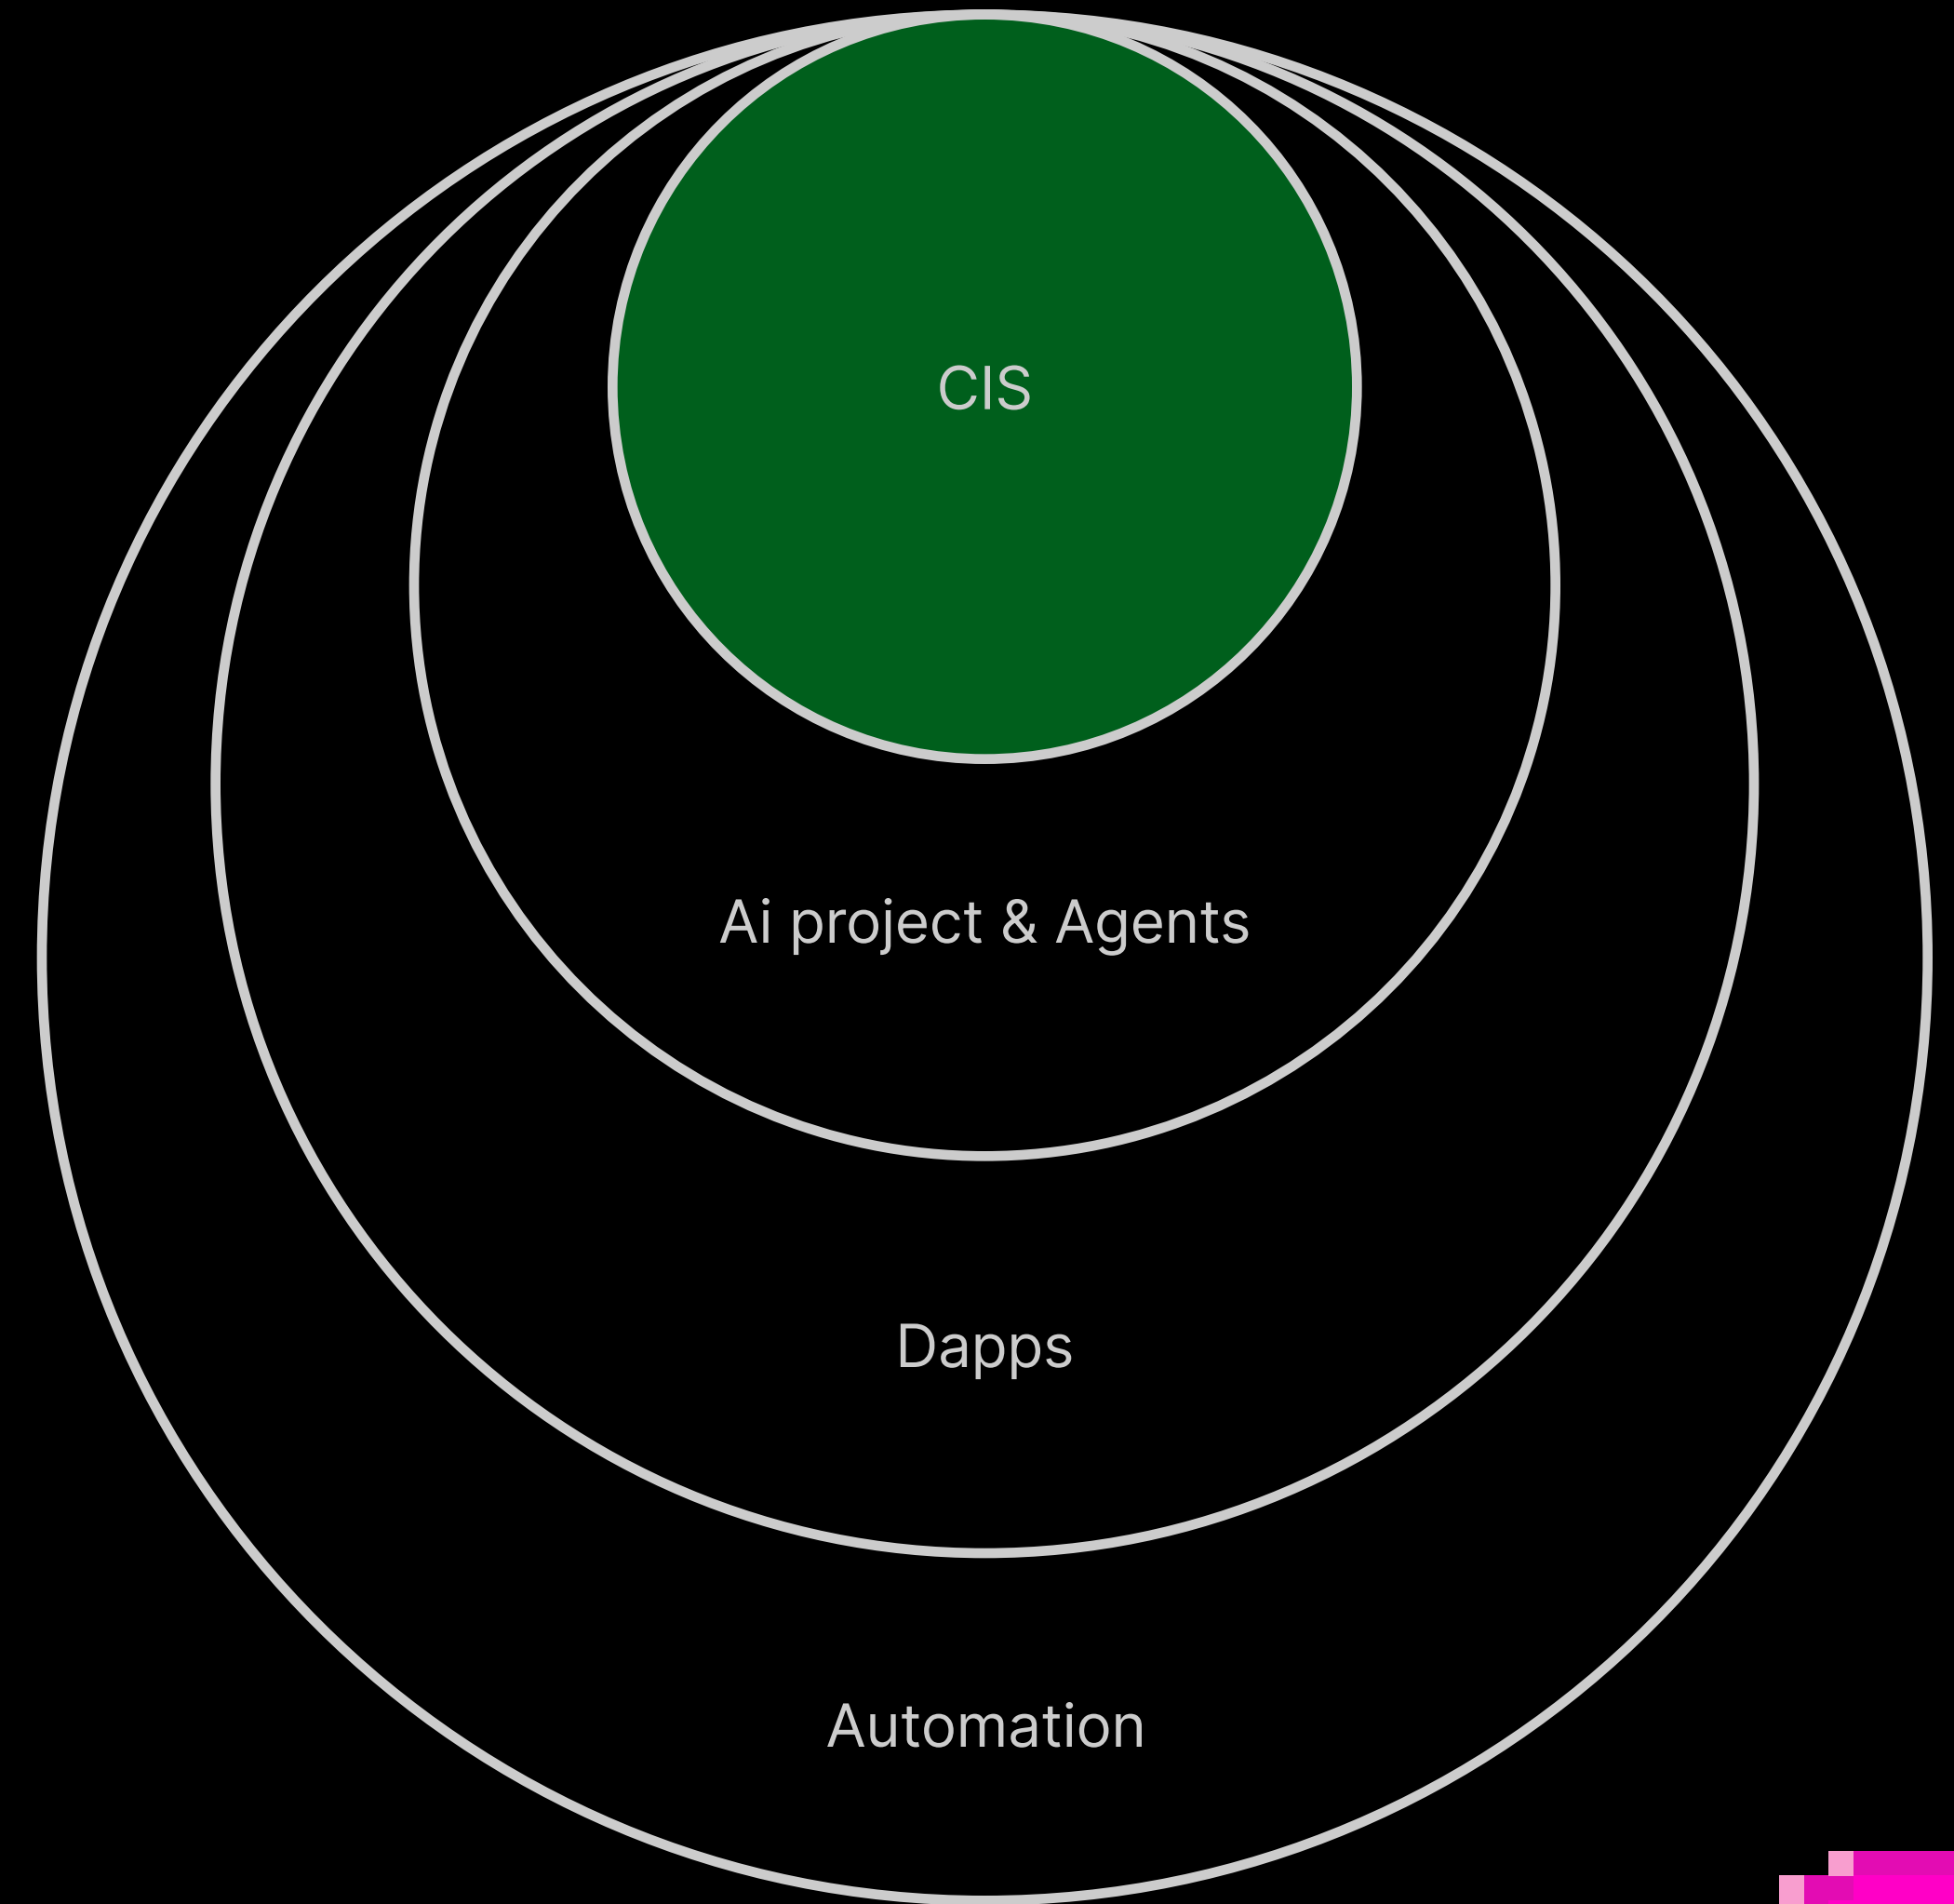

**It's how we make
business grow.**

**Bots can be running
businesses & earning .**

**And what we aim
to achieve.**
